Rolled coin dispenser

A secure method for storing and dispensing rolled coin in combination with other Glory cash handling solutions.

Glory Global Solutions is a World Expert in cash management, delivering technology and solutions that provide security, productivity and innovation to our customers. These solutions are supported by the technical expertise of GLORY Group of Japan, the pioneer in development and manufacture of money handling machines across the financial, retail, vending machine, amusement and gaming industries for nearly 100 years.

Across the world, Glory Global Solutions is trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity. 2,500 professionals, including over 1,300 service and support staff and 350 business partners cover over 128 countries delivering these solutions – wherever money moves.

The coin handling challenge

Every year, billions of coins circulate throughout the world's economies. With the advent of digital payments, the demise of coinage has often been predicted. In reality for the world's population, coins continue to remain as popular today as they have always been. Intrinsically they are convenient and fast to use, flexible as a means of exchange and recognised universally. Every indication is that coins will remain central to economies worldwide for generations to come.

Coin management is a significant challenge, with the billions of coins in use across the world demanding expert management and handling. When released into circulation and into the hands of consumers, processes and technologies continue to manage their journey through cash centres, banks, retailers and businesses.

Coins are a fundamental part of currency transactions, not only for consumers, but for all players in the cash cycle. Merchants need to ensure they have coin available to service their customers' transactions. Retailers must have sufficient and balanced coin funds available at their checkout positions. Bank branches must ensure they have enough coin to meet the demands of their merchant customers who come to collect coin for their businesses. Ensuring the right denomination, value and balance of coin is available at all points in the cash cycle can be a challenge.

Introducing the PWC-10 rolled coin dispenser

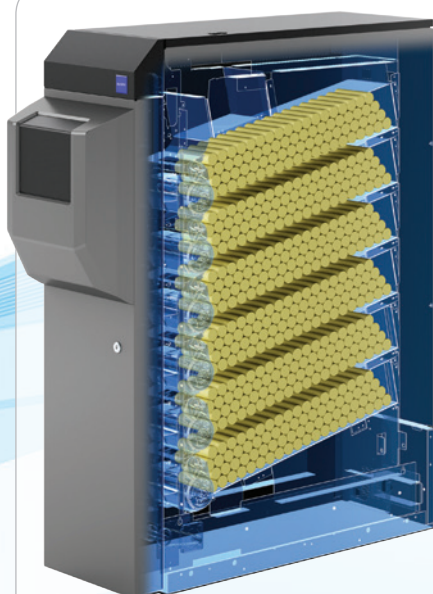

The PWC-10 rolled coin dispenser from Glory provides a fast and efficient solution for the provision of coin funds whenever and wherever coin is required. Providing a secure storage device for rolled coin, PWC-10 can be deployed at virtually any location that has a high coin provision requirement.

For bank branches, PWC-10 can play a pivotal role in the provision of coin funds to merchants. When visiting the branch to obtain coin funds, merchants want to be able to collect their coin quickly so they can return to their business operations. PWC-10 can be deployed at a dedicated merchant counter to provide rolled coin to business customers and therefore contributing to a reduction in waiting times and the provision of a better and more efficient service to both personal and business customer alike.

For retailers, the PWC-10 can be placed in the back office and used to dispense coin rolls to checkout positions to ensure they always have a constant supply of change funds. Coin rolls can be manually replenished by cash managers or even CIT personnel in the back office as and when needed. By dispensing only the exact denominations required for checkout positions, PWC-10 can help improve the operational workflow of a retail store.

Flexible integration options

To further enhance efficiency and functionality, PWC-10 can be easily integrated with many other Glory cash handling solutions. For example, Glory's CASHINFINITY™ range for retail stores or the RBG-series of teller cash recyclers, allowing both banknote and coin handling to be combined into one solution. Glory also offers a range of coin wrapping devices that can be used to prepare loose coin into rolls that can replenish the PWC-10.

PWC-10 – delivers multiple user benefits wherever there is a requirement to handle bulk coin

- Fast coin roll delivery when and where it's required
- Improves customer service at merchant counters in bank branches
- Provides cashiers with a source of coin change funds, to ensure their tills are always able to provide change to customers
- Flexible integration with other Glory equipment, to provide a complementary solution for coin roll provision
- Can help reduce queue waiting times in the branch, as coin is already prepared for customers
- Provides retailers an efficient way to replenish coin change funds, as only denominations that are needed can be dispensed, which in turn enhances operational workflow
- Reduces the time cashiers and tellers need to spend on preparing coin, and frees their time for more value-added activities
